

Partner Portal

Its Partner Portal where partners can request for partnership, manage contracts, marketing programs, team training, collaborate with other partners to reach customers.

About client :

Client is one of Fortune 500 Company. Client is a multinational company having offices in 60 countries which provides a wide range of hardware devices, software solutions and different types of services to customers and enterprises including consumers in the government, health, and education sectors.

BUSINESS REQUIREMENTS :

The existing portal should be migrated to the newer version 7.2 DXP.

The look and feel should be updated. Headers, footers, carousels, articles, eServices, Promotions pages, and Document library should be redesigned.

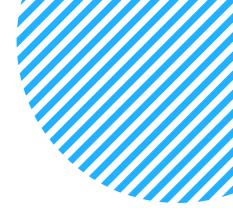

Each site should have unique titles. This needs to be configurable.

Users should be able to navigate to the different sites from the header only. Also, the header should contain a search bar and language selector.

The carousel should be fully customized. Users should be able to set the ratio of content and image, alignment of content and image, choose colors for font & backgrounds, select one or more logos, choose the buttons and link the buttons to the inside liferay page or external links.

Quick Facts :

66 Industry: **Information & Technology**

Benefits Delivered :

- Provided High-Quality User Experience.
- Better performance even with the number of users
- Increases Customer Satisfaction.
- Encourages Collaboration & Improves Communication.

- Users can log in and see the dashboard and the latest news.
- Users can manage their profiles from the profile page.
- Users can see their sites and roles from the customized profile page itself.
- The drag-drop feature was integrated to rearrange the components on the dashboard page.
- Users can set the default site for themselves, so when they log in, they will be redirected to the particular site.
- Partner portal users (PPU) can see the details of their partners and contracts.
 - \circ Which includes the benefits in the form of articles and a list of documents.
- Partner portal offers various eServices and promotion cards to PPU.
- PPU can see and navigate to the page using shortcut links in the carousel.

We have worked with several of their developers. They are reliable, thorough, smart, available, extremely good communicators and very friendly! We would recommend hiring IGNEK to anyone looking for a highly productive and solution driven team. We plan to continue to work with them for the long term.

SOLUTION/ TECHNOLOGY USES:

Liferay:

- Created themes to redesign elements of the partner portal.
- Leverage the custom fields to store custom data for the OOTB entity.
- Developed custom modules to fulfill certain requirements.
- Customized the Elastic search, Liferay JSPs, Liferay services, and actions.
- Used Asset publisher module and creates various templates.
- Used categories and tagging features.

Elastic search

- Used for faster content retrieval
- Implemented CCR as there were multiple nodes of Liferay and elastic search
- Written analyzers in the elastic search

Python script

Used to create an autodeployment script to achieve deployment in various servers.

5

ltext pdf

Used to generate various reports and agreements.

Used to implement a dragdrop feature in the dashboard page

JAX-RS web services:

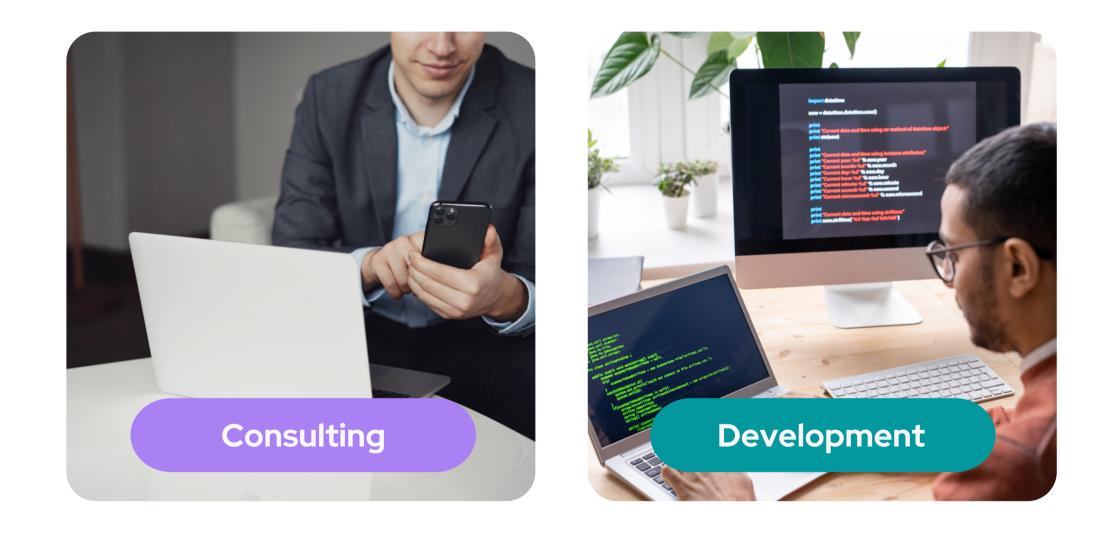

Implemented JAX RS based **REST API to return statistics** related to data so that other systems can consume and display them.
