Waste Management Portal

The Waste Management Portal is a website where industry or individuals can apply for various waste management services, apply for jobs, get the latest news about the environment, find upcoming events, and much more.

About client :

The client is the Environmental Service Holding Company. The client wants to move the country toward sustainable waste management practices. The client has an interest in spearheading the change in order to provide the waste management industry with the best foundation possible for the future and conserve the environment of their country.

BUSINESS REQUIREMENTS :

Client wants to redesign each element of the portal like Header, Footer, eServices, News, Publications, Events, Services, Social media feeds , Login Experience and Careers section as well.

Home page should display a banner video about the client's work, Latest News, upcoming events, social feeds and a partner section.

Client wanted a multilingual website so that the users can have experience in their native language.

A page with the messages, goals, and future plans of the board members should be displayed on the portal.

Users should be able to apply for waste management services provided by the client.

Quick Facts :

" Industry: Environmental Services Website "

SOLUTION/ TECHNOLOGY USES:

1

Liferay DXP 7.4

- We've leveraged almost all of the OOTB features of Liferay for this portal development.
- We've used liferay objects and liferay forms to save the entries for vacancies, courses, and ticket booking.
- We have used a stylesheet so that the administrator can change the colors of the theme directly from the control panel.
- We have used web content to publish the news, FAQs, events, etc.
- We have used liferay's workflow for waste management services
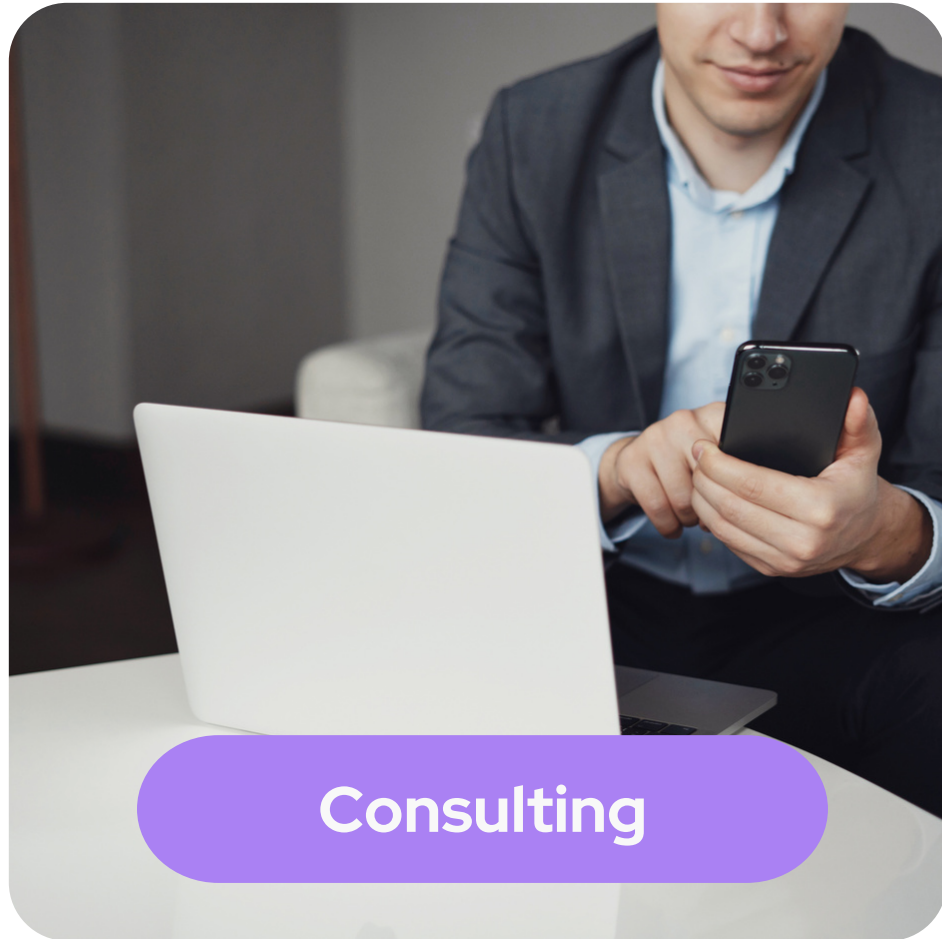

2

reCAPTCHA

To protect the portal from spam and abuse, reCAPTCHA is used while filling out the form.

3

Splide Slider

The content from the news, events, and social feeds are displayed in the carousel using Splide Slider.
